

🤔 What do you know about 3D Art?

What is 3D Art?

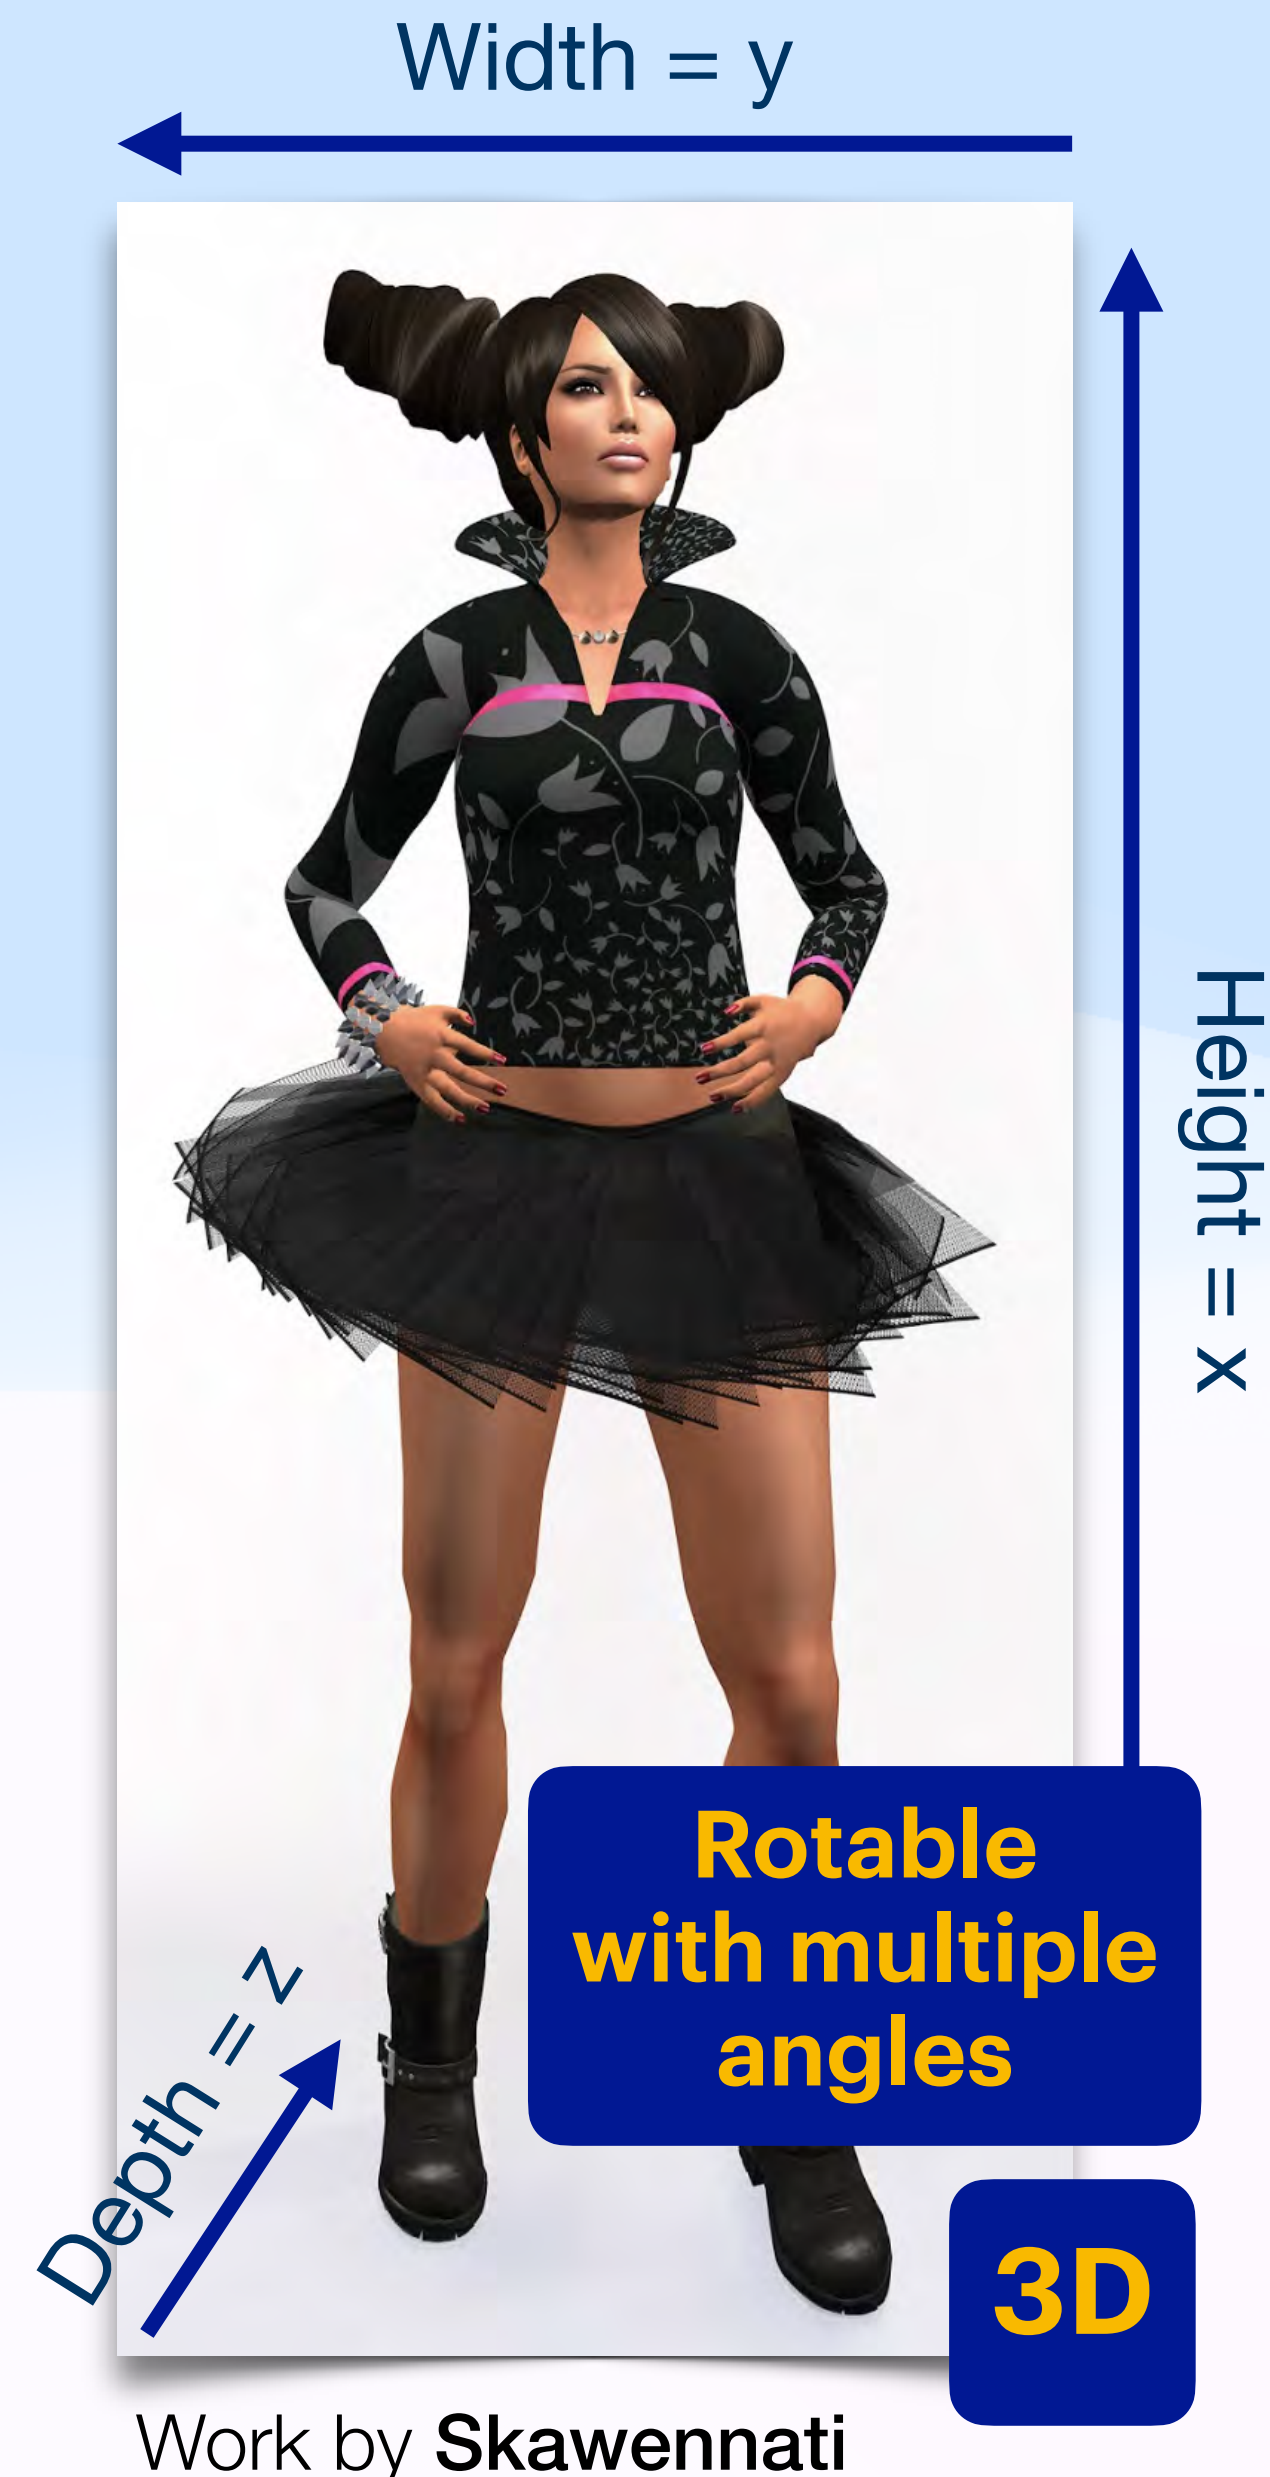

Motion Capture and Animation Foundations — Part 1: 3D Art and Animation in Blender

Barbie

What differences do you notice between these two images?

Think about how these two figures occupy space.

Work by Skawennati

What Can You Make in 3D?

Characters

Environments

Objects/Props

Animation

Video Games

Virtual Performances

For this class, we will focus on characters and environments to create a short animation by the end of the week.

V[R]ignettes by Australian artist Mez Breeze

V[R]ignettes is a series comprised of 3D and VR crafted micro-stories.

What is VR?

Virtual reality (VR) is an immersive, computer-generated 3D environment.

When exploring each micro-story, a reader will experience poetic language and various visual, textual and technological elements that require direct audience input.

3D and Storytelling

TimeTraveller™ by Skawennati
Kanien'kehá:ka (Mohawk),
Indigenous, Canadian artist

<https://skawennati.com/projects/timetraveller/>

Skawennati uses 3D avatars and virtual environments to **tell the story of Hunter**, a young Mohawk man who time-travels to explore moments of Indigenous resistance and resilience.

She creates 3D characters who wear futuristic ribbon shirts and visit digital versions of real places —residential schools, protests, space stations. Every object and space becomes part of the story.

What story can you tell through the way your character looks and the space they live in?

Looking Ahead:

Think briefly about these questions.

- Who will you create? 🧑🏻 🎤 🧑🏻 🚀 🧙🏻 🧛🏻 🧔🏻 🤖 🐸 🐙 🐋 🌟 ...
- Where will they live? 🏙️ 🌃 🏢 🏞️ 🌟 🌕 🏠 🏡 🏛️ 🏯 🌟 ...
- If your character could say one line—what would it be?

💬 📢 Let's do a round and share your ideas.
